EDUCATION

Florida International University

B.S. in Computer Science — GPA: 3.61

Miami, FL

Jun. 2023 – Apr. 2027

- **Relevant Courses:** Data Structures, Operating Systems, Applied Linear Structures, Database Management, Artificial Intelligence
- **Extracurricular:** Director of Digital Media @ INIT FIU, Colorstack

EXPERIENCE

Salesforce

Software Engineer Intern

San Francisco, CA

May 2026 – Aug. 2026

- Cut Spark logging costs by ~\$300K/month (~\$3.6M annually) by designing and shipping to production a log-search REST API that streams, decompresses, and greps gzipped application logs from AWS S3, replacing the team's Splunk pipeline.
- Enabled an AI agent to autonomously diagnose why Spark jobs failed by exposing the API as a Model Context Protocol (MCP) tool over an Envoy service-mesh mTLS connection.
- Restored 2–10 replica autoscaling on the Spark History Server extension service by root-causing a Kubernetes ambiguous-selector bug and executing a zero-downtime deployment cutover via Helm pruning.
- Delivered one-step Spark failure, cost, and bottleneck debugging to internal customers by shipping a Claude Code plugin that bundles 4 MCP servers and 7 skills, collapsing a multi-tool setup into a single install.

Salesforce

Software Engineer Intern

San Francisco, CA

June 2025 – Aug. 2025

- Selected as 1 of 30 interns for the Salesforce FTL program; completed an intensive 10-week, project-based curriculum building full-stack applications with the PERN (PostgreSQL, Express, React, Node.js) stack.
- Collaborated with 2 interns to build and deploy “Codifica,” a full-stack app helping non-native English speakers learn to code via an in-browser IDE and a 250+ term dictionary gathered from an open source library.
- Gained hands-on experience in Project Management, software testing, and agile methodologies (weekly stand-ups, sprints, and retrospectives).

Computer Science Tutor

STARS FIU

Miami, FL

Aug. 2025 – Present

- Provided in-depth sessions to 500+ students in OOP, Data Structures, Discrete Math, Operating Systems, Software Engineering, and programming fundamentals.
- Designed personalized learning plans for students, improving students' exam scores by up to 25%.
- Instilled industry-standard coding practices, emphasizing clean architecture, modular design, and efficient memory management in Java and Python.

PROJECTS

Codifica | React, Express, Node.js, PostgreSQL, Prisma

June 2025 – Aug. 2025

- Co-developed a full-stack web application using the PERN stack with 2 other interns to help non-native English speakers learn programming.
- Engineered an in-browser IDE by integrating Judge0 (code execution) and CodeMirror (editor) APIs, supporting 3+ programming languages.
- Integrated an AI-powered assistant using Gemini's API that gives tailored responses based on the user's preferences and preferred language.
- Incorporated user feedback from 30+ users to improve accessibility and optimized the AI assistant's response time by 35% through refined API calls and prompt engineering.

CreatorsFIU | React, TailwindCSS, Firebase

Jan. 2025 – Apr. 2025

- Collaborated with a team of 7+ members to develop a full-stack application serving university students with a place to buy and sell school-related items.
- Engineered a scalable and responsive frontend using React and TailwindCSS, building 15+ reusable components for features like product listings/cards and user profiles.
- Built a user authentication system using Firebase authentication and database services to store customer information and sync between devices, increasing user login speeds by up to 30%.
- Authored 20+ user stories to help develop CreatorsFIU, guiding the team's development sprints.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, TypeScript, SQL (Postgres), HTML/CSS

Frameworks: React, Node.js, Express, TailwindCSS, Material-UI

Infrastructure & Tools: Kubernetes, Helm, Docker, AWS (S3), Apache Spark, REST APIs, Git, CI/CD, service mesh (Envoy/mTLS)

Libraries & Concepts: pandas, NumPy, Model Context Protocol (MCP), distributed systems, autoscaling
