EDUCATION

Florida International University

Miami, FL

B.S. in Computer Science; GPA: 3.61

Jun. 2023 – May 2027

- Relevant coursework: Data Structures, Systems Programming, Operating Systems, Database Management, Artificial Intelligence, Discrete Structures, Computer Architecture, Software Engineering I

EXPERIENCE

Salesforce

May 2026 – Aug. 2026

Software Engineer Intern, Hyperforce Platform Services

San Francisco, CA

- Shipped a production log-search REST API that streams, decompresses, and greps gzipped logs from AWS S3, replacing the team's Splunk pipeline and reducing Spark logging costs
- Enabled autonomous AI diagnosis of Spark job failures by exposing the log-search API as a Model Context Protocol (MCP) tool over an Envoy service-mesh mTLS connection
- Automated close to **40%** of Spark application support tickets by shipping a Claude Code plugin bundling **4 MCP servers and 7 skills**, freeing roughly **15 hours/week** for on-call engineers
- Delivered **20** merged pull requests and **7,400+** additions across two repositories, backed by **219+** Vitest, pytest, and Jest tests; hardened the API against path-traversal and shell-injection risks
- Fixed a Kubernetes autoscaling bug through a zero-downtime Helm cutover while building internal developer tooling for Spark and Kafka testing infrastructure in the Hyperforce Platform Services organization

Salesforce

Jun. 2025 – Aug. 2025

Software Engineer Intern

San Francisco, CA

- Built Codifica, an AI-powered in-browser code editor, from zero to a deployed PERN application in **10 weeks** as **1 of 30** interns selected from a competitive applicant pool
- Engineered an in-browser IDE using Judge0 for sandboxed execution and CodeMirror for the editor, supporting **3+ programming languages** with no local setup
- Cut AI assistant response time by **35%** by refining API call patterns and tightening prompt structure; built a Gemini-powered multilingual tutor and iterated with feedback from **30+ users**

PROJECTS

RepoAI | React, TypeScript, FastAPI, OpenAI, Pinecone, Tree-sitter | GitHub

- Replaced manual code archaeology with plain-English queries across entire GitHub repositories, cutting engineer reading time by up to **50%** by building a retrieval-augmented generation (RAG) pipeline
- Enabled language-aware semantic retrieval at chunk-level granularity by parsing repositories with Tree-sitter, embedding chunks via the OpenAI API, and storing vectors in Pinecone
- Served queries end to end through FastAPI /ingest and /query endpoints with a React and TypeScript frontend; implemented modular services, Pydantic BaseSettings, SlowAPI rate limiting, CORS handling, and Vercel/Render deployment

CreatorsFIU | React, TailwindCSS, Firebase, MongoDB | INIT Demo Day

- Launched a peer-to-peer student marketplace for FIU students at INIT Demo Day as **1 of 7 engineers** in the cohort-based INIT Build program
- Increased user login speed by up to **30%** by building Firebase-backed authentication with cross-device data sync; developed a responsive React and TailwindCSS homepage
- Scoped and guided the team's development sprints by authoring **20+ user stories**

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, TypeScript, SQL (PostgreSQL), HTML/CSS

Frameworks: React, Node.js, Express, FastAPI, TailwindCSS, Prisma, Firebase

Infrastructure: Kubernetes, Helm, Docker, AWS (S3), Apache Spark, Kafka, REST APIs, Git, CI/CD, Envoy/mTLS

Concepts: MCP, distributed systems, autoscaling, RAG, vector databases, Agile/Scrum

Spoken: English, Spanish (native)

LEADERSHIP & ACTIVITIES

Director of Digital Media, INIT FIU (Dec. 2025 – Present): grew the Instagram account to **6,000+ followers** through photo and video content

CS Tutor, STARS FIU (Aug. 2025 – May 2026): tutored **500+ students** and raised exam scores by up to **25%**

ColorStack Member | ShellHacks Participant (2024, 2025) | **ShellHacks Organizer** (2026)
